GreenTree Mail Hosting brings together the power of enterprise-level email features, Collaboration and ease of management to businesses of all sizes.

A fully managed platform, GreenTree Mail is a service of GreenTree Hosting, LLC. As an extension of GreenTree's hosting "branch", the GreenTree Mail Product is built on robust and redundant IBM and Dell servers, running the Windows Operating System and SmarterMail Enterprise 5.0

GreenTree Hosting has chosen SmarterMail for its feature-rich mail server features, World-Class Webmail Interface, Anti-Spam and Virus capabilities, integration with 3rd party advanced filtering products as well as its security and stability as a product and organization.

What advantage is there to having GreenTree Mail service for your business?

- Have anyone@yourcompany.com
- Advanced Webmail interface for all your users
- Centralized, Secure User Management
- Multiple Administrators can be created
- Collaboration between users calendars, tasks, etc
- POP3, IMAP and Webmail Access for all users
- Fully Managed Hardware & Software Solution
- Servers are housed in SAS70 Datacenters

*Note: Some features noted in the GreenTree Mail description may be package specific or optional items

GreenTree Mail

Managed eMail Hosting Done Right!

ANTI SPAM & ANTI VIRUS

GreenTree Mail uses a structured, multi-layered strategy to achieve high levels of spam and virus protection with exceptionally low false positives.

MAINTENANCE FREE

Updates to the GreenTree Mail platform and advanced filtering devices are included with your subscription and are automatically applied by our GreenTree server administrators.

All GreenTree Mail servers are backed up to our secure, network attached backup arrays once each hour.

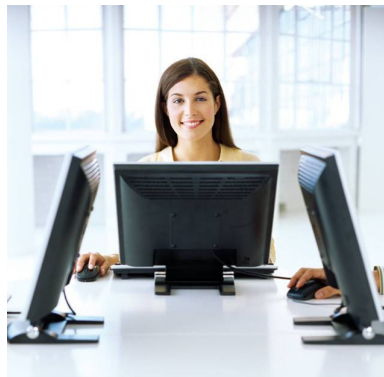

GreenTree Mail removes the complications of making sure your email platform is up to date and performing at maximum levels.

WORKS EVERYWHERE

Whether you are a laptop, desktop or mobile user, your email will work with you everywhere. End users and administrators can login to the webmail interface from any browser that has an internet connection.

*Synchronization may require the installation of additional client software.

Are you an Administrator looking for easy Email Management?

Managing a robust email solution for your domain no longer requires large teams of administrators, servers, bandwidth or even the office "email" guy. Whether you are part of the IT Department or a casual email user, the web based interface is intuitive enough for everyone.

Domain administrators (there can be multiple) can easily manage domain wide settings for Spam Filtering, Content Filtering, Collaboration, User Management, Email Alias Management, List Server Management and much more, all from any web browser ... at the office, at home, on the road!

What can your end users manage on their own with GreenTree Mail?

- Connect via POP3, IMAP and Webmail
- Synchronize* with Outlook, Blackberry, iPhone and SmartPhones
- Manage their own Spam and content filtering, contact lists, calendar, tasks and appointments
- Manage and change their email password
- Manage and change their email autoresponder settings
- Collaborate* with others users in the domain
- View reports about their usage
