

The ultimate dedicated server package

A robust hosting server platform, our base server is a Dell PowerEdge 2950 Server. Expandable to 4 CPU's, 8 GB of memory and more than 3 TB of data ... this is the server of choice for even the most demanding user.

Built in our recommended base configuration, on the stability of a proven Linux operating system, RedHat Enterprise ES 5, this is the ideal server for any online presence.

With more than 1 Terabyte of total storage in base configuration, and utilizing VMWare Server to create multiple VMWare Virtual Servers, this configuration includes:

- A robust email server with a powerful webmail interface for all users, not just Administrators! Extensive SPAM and Virus Filtering for everyone. Easy to create, custom SPAM and Content Filters, Shared Calendars and much more.
- A full featured, Appies Enhanced Web Server. Host all your websites on the Appies VM Server. Sell products using our plug in e-commerce applications. Build and host websites, share pictures, build communities ... the sky is the limit!
- A robust backup server. Create unique backup schedules for all your VM Ware Virtual Server and files. Backup your websites and files daily, weekly, monthly ... you decide. With our software you can even backup files from local pc!

What's included in the base package?

- 2 x Quad Core XEON 5310 CPU's
- 2GB Memory
- Redundant Power Supplies
- RAID 5 Striping with Hot Spare
- 6 x 250 Gigabyte Hard Drives
- 1 Terabyte Total Storage [4 disc total]

What's included in the price?
