

## Startup Dedicated Server Package

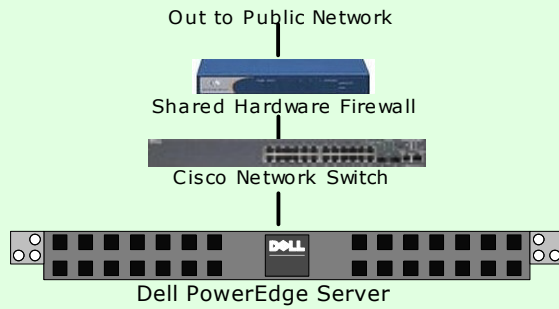

If you're looking for a more private or robust platform than shared web hosting offers, then our Startup Dedicated Server may be a great option for you.

Built on the stable Linux Fedora Operating System, this server, enhanced with our Appies Website Manager Software is a complete hosting package for any web based need!

With 80GB of Gigabytes total storage in base configuration, you can host all your websites on the Appies Enhanced Server. Sell products using our pre-installed e-commerce applications. Build and host websites, share pictures, build communities ... the sky is the limit!

Great uses for this server include:

- More power for your e-commerce site
- More storage for your digital files
- Starting or expanding your hosting company
